● ABOUT MYSELF

Hello, my name is Giacomo and I am a software developer based in Paris.

After completing my studies in Law I developed a strong passion for software engineering and have built a successful career in this field.

Currently in my 5th year in this field, I have gained expertise in all the major and modern technologies.

I have also developed leadership skills through my experience working for Avanade and Tucoenergie.

I am now seeking a new challenge where I can leverage my technical expertise and leadership skills.

I am confident in my ability to consult with departments or customers on project status and proposals, and work on technical issues including software system design and maintenance.

● WORK EXPERIENCE

02/10/2023 – CURRENT Rennes, France

SOFTWARE ENGINEER SEKOIA.IO

As a Front-End Software Engineer at Sekoia.io, I specialize in crafting intuitive and responsive user interfaces for our cybersecurity platform. My work is pivotal in enhancing user experience and ensuring the delivery of high-quality web applications.

Key Responsibilities:

- **Technical Leadership:** Contribute to architectural discussions and decisions, on how to implement new solutions, leveraging my understanding of modern technologies.
- **Continuous Improvement:** Engage in regular retrospectives to evaluate team performance and refine strategies for future projects.
- **Collaboration:** Partner with product management, design, and QA teams to develop pixel-perfect user interfaces that meet user needs.
- **Technical Innovation:** Solve complex front-end challenges by implementing industry best practices and staying updated with the latest technologies, particularly in Angular and React.
- **Mentorship:** Provide support and guidance to junior developers, fostering a culture of continuous learning and feedback within the team.
- **Agile Development:** Engage in agile methodologies, breaking down projects into manageable tasks to ensure timely delivery.
- **Feature Management:** Utilize feature flags to manage the rollout of new functionalities, ensuring a seamless user experience during updates.
- **Quality Assurance:** Conduct thorough testing and debugging to maintain high standards of performance and reliability in our applications.

TECH STACK: Angular, Javascript, Typescript, CSS (Homemade CSS), SQL, Figma, Versioning (GitHub).

09/01/2023 – 07/09/2023 Paris, France

SOFTWARE ENGINEER TUCOENERGIE

At Tucoenergie, I worked as a full stack software engineer, responsible for designing and developing software programs that meet the needs of the company. I worked collaboratively with teams of coders to create websites, update end-user software, and conduct quality control functions. Additionally, I personally collaborated with the UX/UI team to create and realize a design system to use in every one of the company's web applications.

TECH STACK: Javascript + Typescript (React, Node.js), CSS (Homemade CSS), SQL (MySQL, PGAdmin), Azure devops, Figma, Versioning (GitHub, GitLab).

16/05/2022 – 31/12/2022 Rome, Italy

FRONT END DEVELOPER AVANADE

At Avanade, I served as a Senior Front-End Developer for Italy's largest telecommunications company, focusing on the following areas:

- Team Leadership: Led a team of 6 junior developers, providing mentorship and guidance to enhance their skills in Angular and front-end development best practices.
- Micro Frontends Architecture: Spearheaded the development of sophisticated Angular applications utilizing micro frontends (MFE) architecture to improve modularity and scalability.
- Frontend Refactoring: Conducted a comprehensive frontend refactoring and drove the development of new, advanced components to significantly enhance application performance and usability.
- Training Initiatives: Designed and delivered a 15-day course to onboard new developers, introducing them to Angular and fostering a strong foundation in front-end technologies.

TECH STACK: JavaScript + TypeScript (Angular), CSS (Homemade CSS, Bootstrap), SQL (MySQL), Versioning (GitHub, GitLab).

01/07/2022 – 09/01/2023 Rome, Italy

FRONT END DEVELOPER (MOBILE AND WEB) FREELANCE

While working for Avanade, I also worked as a freelance software engineer for Italian and European companies in the field of car sharing, mainly focusing on the following areas:

- Android, iOS, web development with Ionic Framework
- Frontend refactoring, development of new components, development of new features

TECH STACK: Javascript + Typescript (Angular, Ionic), CSS (Homemade CSS, Bootstrap, Material), SQL (MySQL, PGAdmin), Azure devops, Figma, Versioning (GitHub, GitLab).

01/01/2022 – 15/05/2022 Italy

SOFTWARE DEVELOPER FREELANCE

I worked as a freelance software engineer for many Italian and European companies, mainly focusing on the following areas:

- Frontend refactoring and development of new components (Angular, Ract)
- Backend development of (micro)services (Java Spring Boot, Node.js)
- Unit testing
- Refactoring of backend monolithic applications

TECH STACK: Java (Spring Boot), Javascript + Typescript (jQuery, Angular, React, Node.js), CSS (Homemade CSS, Bootstrap, Material), SQL (MySQL), Versioning (GitHub, GitLab).

01/01/2021 – 31/12/2021 Rome, Italy

SOFTWARE DEVELOPER SOLVING TEAM SRL

I worked as a full stack software developer at Solving Team, where I led the revamp of the web platform of a major Italian economic public institution.

I successfully migrated the platform from a monolith to a microservices architecture, worked on query optimization procedures, migrated a frontend application from jQuery to Angular and worked on react projects. I also increased the frontend test coverage from 32% to 65%.

Focus area:

- Migration from monolith to micro services architecture - more than 15 services extracted.
- Database refactoring and monitoring.
- Migration of the frontend from jQuery to Angular
- Worked on React + Node.js applications
- Increased frontend test coverage from 32% to 65%

TECH STACK: Java (Spring Boot), Javascript + Typescript (jQuery, Angular, React, Node.js), CSS (Homemade CSS, Bootstrap, Material), SQL (MySQL, PGAdmin), Azure devops, Figma, Versioning (GitHub, GitLab).
